PROFESSIONAL EXPERIENCE

Tycho Technologies Pvt Ltd — Software Developer

Sep 2022 – Present | Noida, India

- Architected and deployed real-time chat infrastructure using Socket.io, supporting 5k+ daily active users with ultra-low latency.
- Optimized application load times by 40% via React Native performance profiling, bundle reduction, lazy loading, and asset caching.
- Hardened mobile security architecture with SSL Pinning to prevent MITM attacks and safeguard sensitive data transmission.
- Configured custom ProGuard obfuscation rules, shrinking production APK sizes and enhancing binary reverse-engineering protection.

Ficode Software Solution — Intern Software Engineer

Mar 2022 – Sep 2022 | Mohali, India

- Developed modular, reusable UI components for iOS and Android adhering strictly to Figma design tokens and mobile usability standards.
- Integrated secure REST endpoints, squashed memory leaks in complex navigation hierarchies, and supported build staging via Android Studio and Xcode.

CLIENT & ENTERPRISE PROJECTS

Imwov Health & Fitness Ecosystem (React Native, Socket.io, Redux, Realm DB)

Play Store (50K+) | App Store

- Integrated real-time AI chatbot assisting 50k+ active users with tailored fitness guidance, dynamic insights, and automated query handling.
- Managed staging, automated code-signing, and multi-track production deployments across TestFlight and Google Play Console.
- Implemented low-latency coach communication via Socket.io and background physical activity trackers with battery-optimized local caching.

VTS360 Enterprise Forensic & Spatial Modeling (React Native iOS, Native Hardware APIs, Core Data)

US Enterprise Client (M&A Acquired)

- Engineered an enterprise iOS forensic application leveraging camera and spatial sensors to capture and map 360° structural models for forensic analysis.
- Architected high-throughput local data pipelines ensuring zero data loss during high-resolution 3D scan processing prior to corporate platform acquisition.

Tycho Technologies – Corporate AI & Digital Platform (Next.js, Tailwind CSS)

Live Website

- Engineered a responsive corporate platform in Next.js, translating high-fidelity UI into reusable components across services, testimonials, and partner flows.
- Architected data-driven UI modules for 10+ digital service lines and client showcases, eliminating code duplication and simplifying maintenance.
- Implemented conversion-optimized inquiry forms, interactive navigation, and performance-conscious page structures across desktop and mobile.
